Utilities for Basking Ridge, NJ

May I suggest that no later than one week before closing (even longer if you can), that you make arrangements to have the utilities transferred to your name for commencement on closing day. It is easier to have them provide seamless service, than to disconnect and connect again.

One note: certain parts of Basking Ridge get both gas and electric from PSE&G, while others have it split out into two companies. Also, there is competition among utilities, so you should not feel limited by the list below. I encourage you to explore what other options are available before settling in. This list is provided as a courtesy but may not be all-inclusive. You should also get estimates first on trash services as they vary.

Any questions, don't hesitate to call me. Should a number no longer be valid, please call me, so I can correct for future homeowners. Best wishes in your new home. The town services section provides the place to get your dump sticker.
